Classic

Double Hung Replacement Window

Shown with optional foam-filled frame/sash

Classic features

The Harvey Classic vinyl double hung replacement window offers a variety of styles, colors and options to meet any homeowner's needs. The Classic window is custom made to fit with very little carpentry needed, reducing installation time and mess. Our sleek fully welded sash and frame design provides a one-piece sloped sill and better performance than ordinary vinyl windows, with an air-tight seal that keeps wind and water where they belong – outside. Consult your professional contractor to discuss which options are right for you.

- ENERGY STAR® qualified with optional Low-E glazing (add Argon gas for additional energy efficiency)
- Factory calibrated block & tackle sash balances never need adjustment or lubrication
- Ventilation limit latches that keep top or bottom sash partially open
- Locking fiberglass half screen
- Color matched hardware with Brasstone and Brushed Nickel optional

Tilt-in top and bottom sash for easy cleaning.

Thermal Performance

Glazing	U-Factor	R-Value	SHGC	Visible Light Transmittance	ENERGY STAR Compliance
Clear	0.48	2.08	0.57	0.61	---
Low-E	0.35*	2.86	0.30	0.54	All Zones
Low-E/Argon	0.32	3.13	0.30	0.54	All Zones
2X Low-E/Argon	0.31	3.23	0.28	0.48	All Zones
Federal Incentive Package [†]	0.30	3.33	0.21	0.49	All Zones

*.35 U-Factor or lower are ENERGY STAR qualified in all 50 states. For structural performance values and other product specifications, visit harveybp.com.

[†]Classic windows can qualify for a federal tax credit under The American Recovery and Reinvestment Act of 2009. For the latest program guidelines and qualifications, please visit harveybp.com and consult a tax professional.

U-factor measures the rate of non-solar heat transfer from one side of the window to the other. Heat transfer implies both heat loss out of a living space during cold weather and non-solar heat gain during hot summer months. The lower the U-factor, the better the performance.

R-value measures the resistance of a glazing material or fenestration assembly to heat flow. A high R-value window has a greater resistance to heat flow and a higher insulating value than one with a low R-value.

Solar Heat Gain Coefficient (SHGC) measures how well a product blocks heat from the sun. The lower the SHGC, the better a product is at blocking unwanted heat gain.

Visible Transmittance (VT) measures how much light comes through a product. The higher the VT, the more light that comes through.

About Harvey Building Products

Harvey has built a solid reputation as a leading manufacturer and distributor of quality building products. A family-owned and operated business with over 45 years' experience, Harvey Building Products is known for outstanding craftsmanship and superior service as well as standing behind every product we make. In addition to manufacturing durable, attractive windows, doors and patio rooms, Harvey distributes a full line of highly respected building products to professional contractors and builders throughout the Northeast.

We understand what it takes to be part of your home.™
