Patio Doors

Vigilance patio door

While they can be used for other applications where added performance is desired, Vigilance windows were created to meet coastal building codes, among the most stringent followed in our industry. Available in white only.

- ENERGY STAR® qualified with standard Low-E/Argon glazing
- Impact rated with DP50 performance
- Fiberglass screen with extruded aluminum frame
- Corrosion resistant color-matched hardware

Note: Vigilance patio doors have limited options available. Please call for available options.

Harvey vinyl patio door

The Harvey vinyl patio door is solidly constructed and reinforced with heavy-duty aluminum for added durability. Welded sash corners provide maximum strength while multi-chambered frame extrusions further increase their stability and thermal efficiency. Includes a heavy-duty screen, and can be customized to suit your style. Available in over 25 exterior colors.

- ENERGY STAR® qualified with standard Low-E/Argon glazing
- Integral fin frame and screen track
- Sloped sill design for drainage
- Fiberglass screen with extruded aluminum frame
- Corrosion resistant seacoast package available

Tribute patio door

The Harvey Tribute patio door offers all the great features of our traditional vinyl patio door, plus enhanced features such as standard Double Low-E/Argon and an easy-cleaning glass. For the ultimate in energy efficiency, add our optional High Performance Package with three panes of glass, two panes of Low-E coating and Krypton gas between both air spaces.

- Easy Clean Glass
- Double Low-E Glass
- Dual Glazed units have 2x Low-E/Argon + SunClean Glass
- Triple Glazed units have 2x Low-E/Krypton + SunClean Glass

exterior casing

3" flat with sill nose

908 with sill nose

To enhance the beauty of your patio door, Harvey also offers maintenance-free vinyl exterior casing. The factory-applied casing with fusion-welded corners eliminates the need for exterior caulking and produces a clean, upscale look.

No extension jambs available for patio doors. Exterior casing available for new construction styles only. Other casing styles available. Ask for details.

*.35 U-Factor or lower are ENERGY STAR qualified in all 50 states. For structural performance values and other product specifications, visit harveybp.com.

U-factor measures the rate of non-solar heat transfer from one side of the window to the other. Heat transfer implies both heat loss out of a living space during cold weather and non-solar heat gain during hot summer months. The lower the U-factor, the better the performance.

R-value measures the resistance of a glazing material or fenestration assembly to heat flow. A high R-value window has a greater resistance to heat flow and a higher insulating value than one with a low R-value.

Solar Heat Gain Coefficient (SHGC) measures how well a product blocks heat from the sun. The lower the SHGC, the better a product is at blocking unwanted heat gain.

Visible Transmittance (VT) measures how much light comes through a product. The higher the VT, the more light that comes through.

About Harvey Building Products

Harvey has built a solid reputation as a leading manufacturer and distributor of quality building products. A family-owned and operated business with over 45 years' experience, Harvey Building Products is known for outstanding craftsmanship and superior service as well as standing behind every product we make. In addition to manufacturing durable, attractive windows, doors and patio rooms, Harvey distributes a full line of highly respected building products to professional contractors and builders throughout the Northeast.

We understand what it takes to be part of your home.™
